WEIGHMASTER III

TWIN AUGER FILLER

MODEL 4192

Since 1943

UTILITY REQUIREMENTS:

ELECTRICAL: 230/460 V., 60 Hz., 3 Ph.,

AIR: 2 1/2 CFM @ 80 PSI

FILL WEIGHTS:

BAGS: 20lbs. - 110lbs.

BOXES/DRUMS: 50lbs. - 220lbs.

DESIGN FEATURES:

- **Electronic load cell maintains accurate fill weights.**
- **Twin auger design offers highly controlled fill rates up to (10) 50 lb bags per minute.**
- **PLC controlled bulk & dribble feed achieves weight accuracies of +/- 0.2 lbs.**
- **Air operated bag clamps with auto-start, bag-in-place switch prevents accidental spills.**
- **Air operated positive product cut-off.**
- **Automatic air purge system for auger seals.**
- **Dust collection port to maintain a clean work atmosphere.**
- **(2) easy access hopper clean out doors with safety interlock switches.**
- **Easily removable augers for thorough machine clean-out.**
- **NEMA 12 electrical system.**

AVAILABLE FEATURES:

- **Feeder ribbon or spiked agitator in primary hopper for sluggish materials.**
- **Drum, box & tote filling attachments.**
- **Special finishes including corrosion resistant and food-grade stainless steel.**
- **Special electrical packages including wash-down and explosion-proof.**
- **In-feed supply hoppers to fit specific applications.**
