

The Right Equipment For The Job

LumpMaster®

Reduce compacted material and agglomerations to easy-to-convey product.

Engineered for compact, inline operation. - This lump breaker easily integrates into your existing or new feeding system. Two gear-driven, counter rotating finger shafts and side combs claw through compacted material and agglomerations. Lumps quickly break down to easier-to-convey particles.

Optional configurations meet your specific needs. Choose from standard carbon steel, 304 or 316 stainless steel construction. Options for washdown or explosion-proof applications are available.
